

HELINOX GROUND CHAIR

Sit dry!

Whether you are a backcountry skier, snow-hiker or freerider: Take the Ground Chair with you and your bottom stays dry. The seat of the chair is closer to the ground so you can relax and stretch your legs after a demanding ascent. With a weight of only 640 grams, it is a suitable choice for moving fast and light in the mountains.

The Ground Chair is well suited for all those, looking for an alternative to sitting in wet snow and want to save weight at the same time. The chair can be set up in a few seconds thanks to the signature Helinox frame assembly system. The frame is made out of high-quality, sustainably-manufactured, lightweight and ultra-strong DAC aluminium.

The square frame of the Ground Chair increases stability in snow. Due to the side mesh inserts it comes with an extraordinary seating comfort and is well suited for cozy evenings at the campfire or a quick lunchbreak while on tour. Simply create a little flat surface in the snow, set up the chair and enjoy the winter months with the Helinox Ground Chair.

The must-have snow chair is available at a recommended retail price of 100 euros in specialist shops.
